OFFSHORE PIPELINES
SPOOLBASE & MULTIJointING
SUBSEA FABRICATION

THE WORLD'S PREMIUM OFFSHORE WELDING PARTNER

Serimax provides high quality automatic and manual welding services for the offshore market, including offshore pipeline installation, spoolbases & multijointing and subsea fabrication. Our solutions encompass fit-for-purpose equipment, skilled personnel, and full turnkey project management.

DELIVERING UNIQUE EXPERTISE AND SOLUTIONS

Serimax offers specialist expertise for the offshore market. We provide personnel, project, operations and site management for welding or full firing line services. Trunklines, flowlines, risers: we weld any material grade to the highest specifications.

DEVELOPING THE MOST ADVANCED AND RELIABLE TECHNOLOGY

Our in-house engineered and designed welding technology is a vector for achieving superior quality on our customers' most challenging offshore projects. Our technology sets industry records in productivity and quality for all types of offshore pipeline requirements (S-Lay, J-Lay and R-Lay).

SUPPORTING LONG-TERM PERFORMANCE

We work hand in hand with our client to develop the right solution for their projects: selecting the best technology, qualifying the most reliable welding procedures and providing the best personnel. We ensure our partners benefit from our experience and knowledge to get it right the first time.
