ONSHORE FABRICATION

THE WORLD'S PREMIUM ONSHORE WELDING PARTNER

Serimax offers unique equipment and welding solutions for landline contractors, capable of undertaking any projects in the most extreme conditions, from -45°C in Canada and Russia to $+55^{\circ}\text{C}$ in Mexico and Saudi Arabia.

DELIVERING UNIQUE FLEXIBILITY AND RELIABILITY FOR OUR CUSTOMERS

Serimax have the ability and expertise to work on any landline project anywhere in the world and support our clients regionally. Our solutions are recognised for efficiency, versatility, reliability and speed of mobilisation to deliver the project schedule.

DEVELOPING VERSATILE AND EFFICIENT TECHNOLOGY

Our equipment is proven to perform in extreme temperatures and environments. Our automatic welding systems, pipe facing equipment, line-up clamps and specialist accessories, along with manual welding expertise, allow Serimax to adapt to any landline project and process. This, coupled with our experienced welders, technicians, project managers and engineers, has positioned Serimax to become the industry leader in both quality and productivity.

BUILDING LONG-TERM PARTNERSHIPS

Our track record of service provision and delivery excellence in the toughest of conditions has allowed us to develop long-term partnerships with leading market players on key projects worldwide.

We provide welding, operations and project management, as well as industry-recognized training to suit the specific project requirements of our key partners.
