

Internax

INTERNAX, THE INTERNAL WELDING CLAMP WITH PIPE REROUNDING CAPABILITIES FOR LANDLINE PROJECTS.

DEDICATED TO ROOT PASS WELDING FOR ONSHORE TRUNK LINE PROJECTS

- High weld productivity for cross-country landlines
- Enhance productivity with 8 fully automatic welding heads
- Pipe rerounding capabilities for better fit-up's with less Hilo and welding issues
- Wireless remote control ensures safe operation
- Advanced welding features and full welding data records

Internax

Equipment Description Range

- Internal welding clamp for onshore trunklines from 36” to 56”
- Minimize pipe out of roundness
- Up to 24m (78 ft) pipe length - for single and dual joints
- Up to 10° slope capacity in standard configuration

Welding Capabilities

- Process: GMAW
- Position: 5G
- Number of welding heads: up to 8
- Welding travel speed: up to 80cm/min
- Oscillation
- Automatic stickout control

Applications

- Line description: trunkline
- Material/Pipe grade: carbon steel

Technical Carateristics

- Dimensions: (to be requested, as specific per model)
- Weight: (to be requested, as specific per model)
- Temperature Operating range: -40°C (-40°F) to 50°C (122°F)
