

Saturnax 07

HIGH PRODUCTIVITY AND ROBUST SOLUTION WITH DUAL TORCH CAPABILITIES, THE SATURNAX IS THE REFERENCE GMAW ORBITAL WELDING SYSTEM DEDICATED TO THE JOINTING OF OFFSHORE AND LANDLINE PIPELINES WITH THE MOST IMPRESSIVE TRACK RECORD

TO ENHANCE PRODUCTIVITY WHILE MAINTAINING REPAIR RATES AT THE LOWEST LEVEL

- Narrow gap
- Dual torches capabilities
- Automation / Mechanization
- Automatic welding parameters control and recording

Saturnax 07

Equipment Description Range

From 4,5" and above
Wall thickness up to 50mm pipe thick in standard configuration
Bug and band
Linear oscillation
Heavy duty and field proven

Welding Capabilities

Process:	GMAW / FCAW
Position:	All
Number of welding heads:	Simple or dual torch
Travel speed:	Up to 120cm/min
Specifications & codes:	All welding codes and standards

Applications

Line description:	All oil and gas pipelines, water and slurry lines
Material/Pipe Grade:	Carbon steel

Technical Characteristics

Weight of welding carriage:	12Kg
Operating temperature range:	-40°C (-40°F) to 50°C(122°F)
Welding directions capabilities:	Uphill and downhill
	Automatic stick out control
	Welding data monitoring and recording
