

Internax

Internax, the internal welding clamp with pipe rerounding capabilities.

Dedicated to root
pass welding for
trunk line projects.

- High weld productivity
- Enhance productivity with 8 fully automatic welding heads
- Pipe rerounding capabilities for better fit-up's with less hilo and welding issues
- Wireless remote control ensures safe operation
- Advanced welding features and full welding data records

Your Welding Partner

Internax

Equipment description range

- Internal welding clamp for trunklines from 36" to 48"
- Minimize pipe out of roundness
- Up to 24m (78 ft) pipe length – for single and dual joints
- Up to 10° slope capacity in standard configuration

Applications

- Line description: trunkline
- Material/Pipe grade: carbon steel

Welding capabilities

- Process: GMAW
- Position: 5G
- Number of welding heads: up to 8
- Welding travel speed: up to 80cm/min
- Oscillation
- Automatic stickout control

Technical Criteria

- Dimensions: (to be requested, as specific per model)
- Weight: (to be requested, as specific per model)
- Temperature Operating range: -40°C (-40°F) to 50°C (122°F)
