

# Saturnax 07

High productivity and robust welding solution with dual torch capabilities. It's the reference of the orbital welding system dedicated to jointing offshore, onshore and in new energy markets with an outstanding track record.

High productivity, flexible dual torch welding. Saturnax 07 is a welding tool for a wide range of applications, grades and materials.

- Enhanced productivity and quality as a result of its multi-grade application and material adaptability
- Narrow gap weld volume, saving consumables and weld cycle times
- Remote operated work for improved operator safety
- Single/Dual Torch mGMAW welding weighing, 12KG operating at up to 120cm/min
- Welding data monitoring and recording

Your Welding Partner

# Saturnax 07

## Equipment description range

- From 4,5" and above
- Wall thickness up to 50mm pipe thick in standard configuration
- Bug and band
- Linear oscillation
- Heavy duty and field proven

## Applications

- Line description: All oil and gas pipelines, water and slurry lines
- Material/Pipe Grade: Carbon steel

## Welding capabilities

- Process: GMAW
- Position: All
- Number of welding heads: Simple or dual torch
- Travel speed: Up to 120cm/min
- Specifications & codes: All welding codes and standards

## Technical Criteria

- Weight of welding carriage: 12KG
- Temperature operating range: -40°C (-40°F) to 50°C(122°F)
- Welding directions capabilities: Uphill and downhill
- Automatic stick out control
- Welding data monitoring and recording
