

# Saturnax 09

Saturnax 09 integrates 40 years of learning and experience and has been designed by welders for welders! The Saturnax range welding systems focus on the golden rules of welding providing performance and quality to your projects!

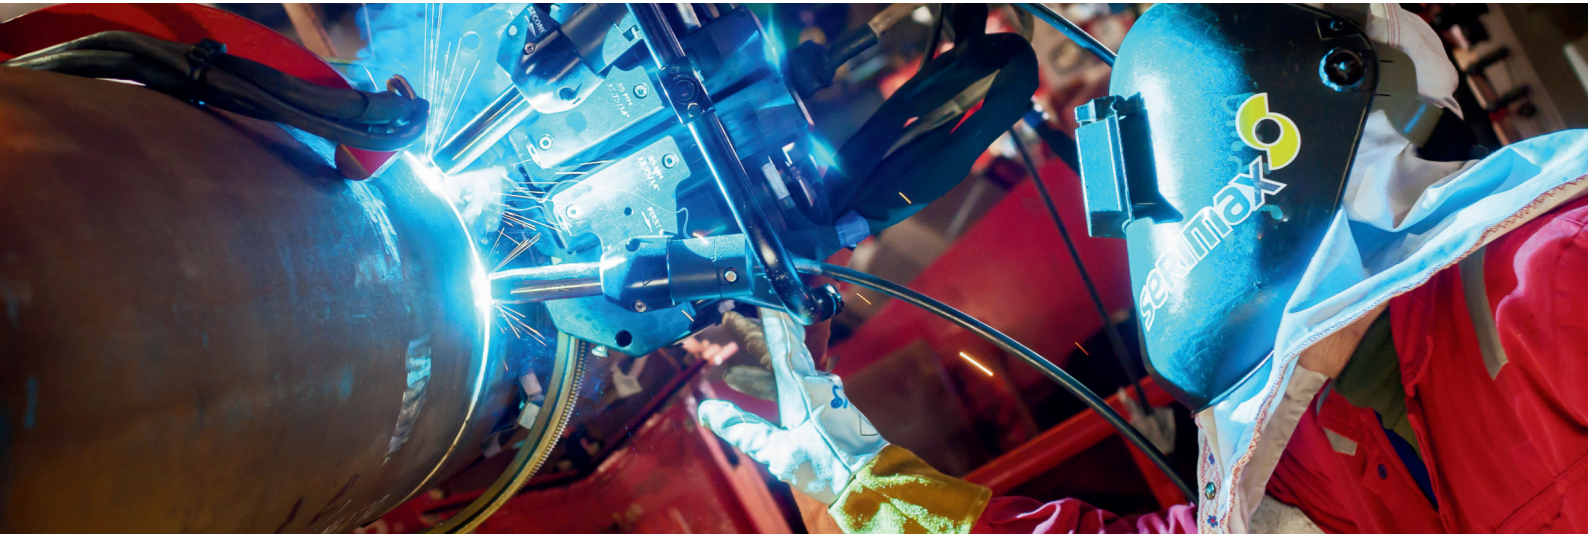

It's robust, digital and multi-process bug and band welding system integrates our strong history of premium pipeline welding experience to deliver the best results.

- Enhanced productivity and quality as a result of its independent dual torch, multi-grade application and material adaptability
- Remote operated work environment for improved operator safety
- Optimised weld quality through integral and Real Time QA/QC recoding and weld data logging
- Independent multi-process welding bug

Your Welding Partner

# Saturnax 09

## Equipment description range

- From 4,5" and above
- Up to 50mm pipe thick in standard configuration
- Bug and Band
- Pendular and linear oscillation
- Heavy duty and field proven

## Applications

- Line description: CRA and all oil and gas pipelines, SCR and sour service lines
- Material/Pipe Grade: Carbon steel & stainless steel

## Welding capabilities

- Process: STT / CMT / GTAW / PGMAW
- Positions: All including 360° orbital welding
- Number of welding heads: Single and dual
- Travel speed: Up to 120cm/min
- Specifications & codes: All welding codes and standards

## Technical Criteria

- Weight of welding carriage: 15KG
- Temperature operating range: -40°C (-40°F) to 50°C(122°F)
- Welding directions capabilities: Uphill and downhill
- Automatic stick out control
- Welding data monitoring and recording
